2022 Guide

Easy to Use Small Business Accounting Software

5 Ways to Make AP Easier

Business owners are looking to reduce manual work and drudgery.

> Finance administrators spend a lot of time manually keying in invoice data, chasing team members for invoice approvals, and keeping track of everything on spreadsheets. All of which is an inefficient way to work every day.

And because you wear many hats in your business, you want to leverage technology to make the accounts payable process less stressful and more optimal for your work-life balance.

Here's five ways you can start to save time and process vendor invoices more easily.

rillion

Once you receive a vendor invoice, you have to enter it into your accounting system. How are you doing that?

Small Business Solution #1

Let Centsoft enter invoice data for you.

HARDER

INVOICE

You manually key in each invoice. You keep track of invoices on a spreadsheet.

EASIER
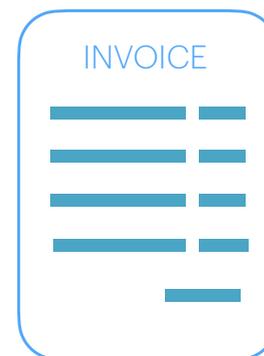

INVOICE

Centsoft captures the invoice information and populates a central dashboard.

rillion

You have to send invoices out for approval, and they need to be paid on time.

Small Business Solution #2

Let Centsoft send out approvals

HARDER

INVOICE

You send invoices out by email. You keep track of invoice status on spreadsheets.

EASIER
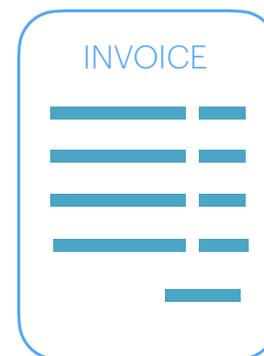

INVOICE

Centsoft sends invoices out for approval. Approvers can approve their invoice on smartphone, tablet or desktop.

rillion

You want to search for data on an invoice, for an outside audit or for an internal investigation.

Small Business Solution #3

Use Centsoft's comprehensive search function

HARDER

INVOICE

Open each and every invoice to find data.

EASIER
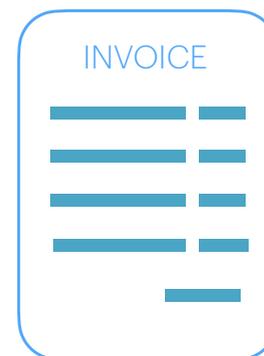

INVOICE

Search for any data on invoices through Centsoft's invoice archive in the cloud.

rillion
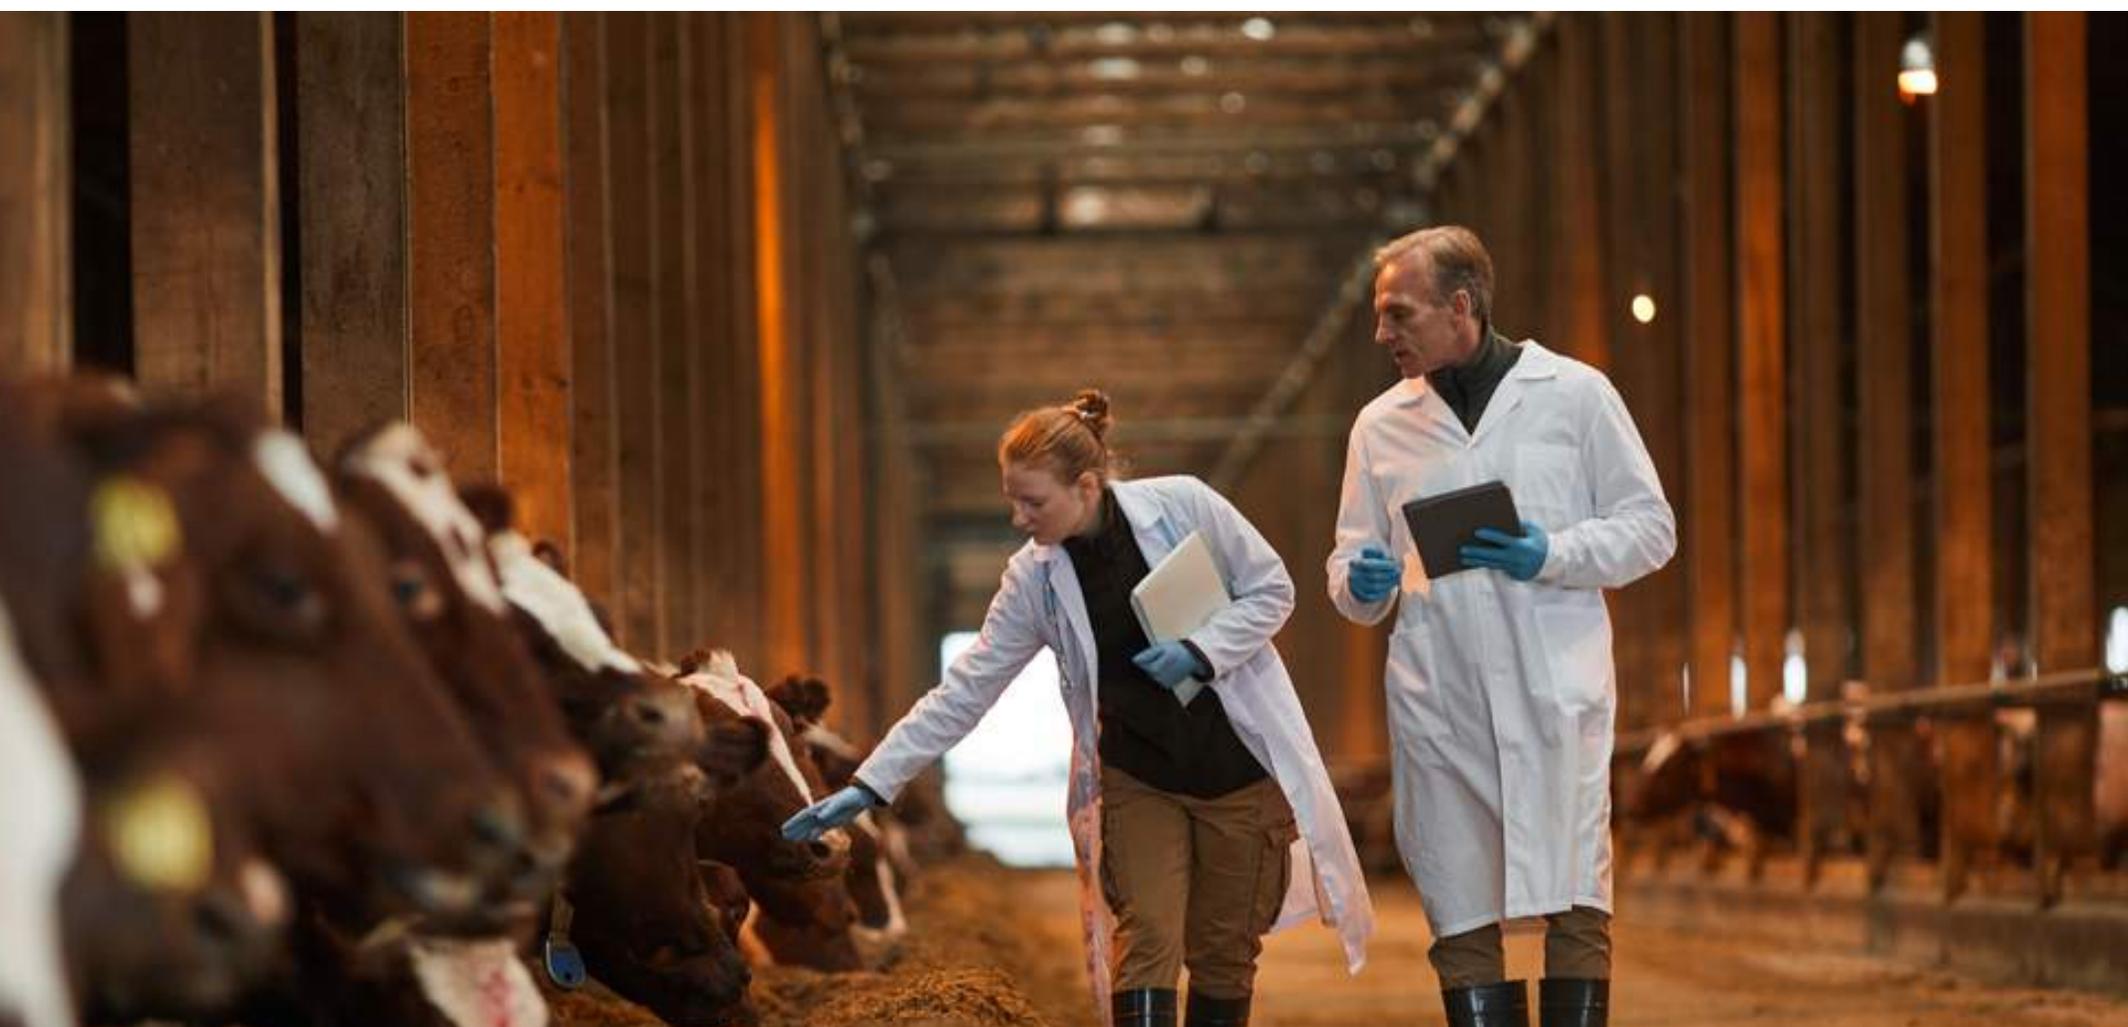

You want to communicate about certain invoice items or amounts

Small Business Solution #4

Use Centsoft's message functionality

HARDER

INVOICE

Send email and make phone calls, writing notes and separating invoices in desktop folders

EASIER
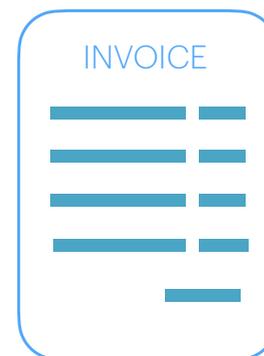

INVOICE

Communicate to any team member instantly with invoice image and comments

rillion
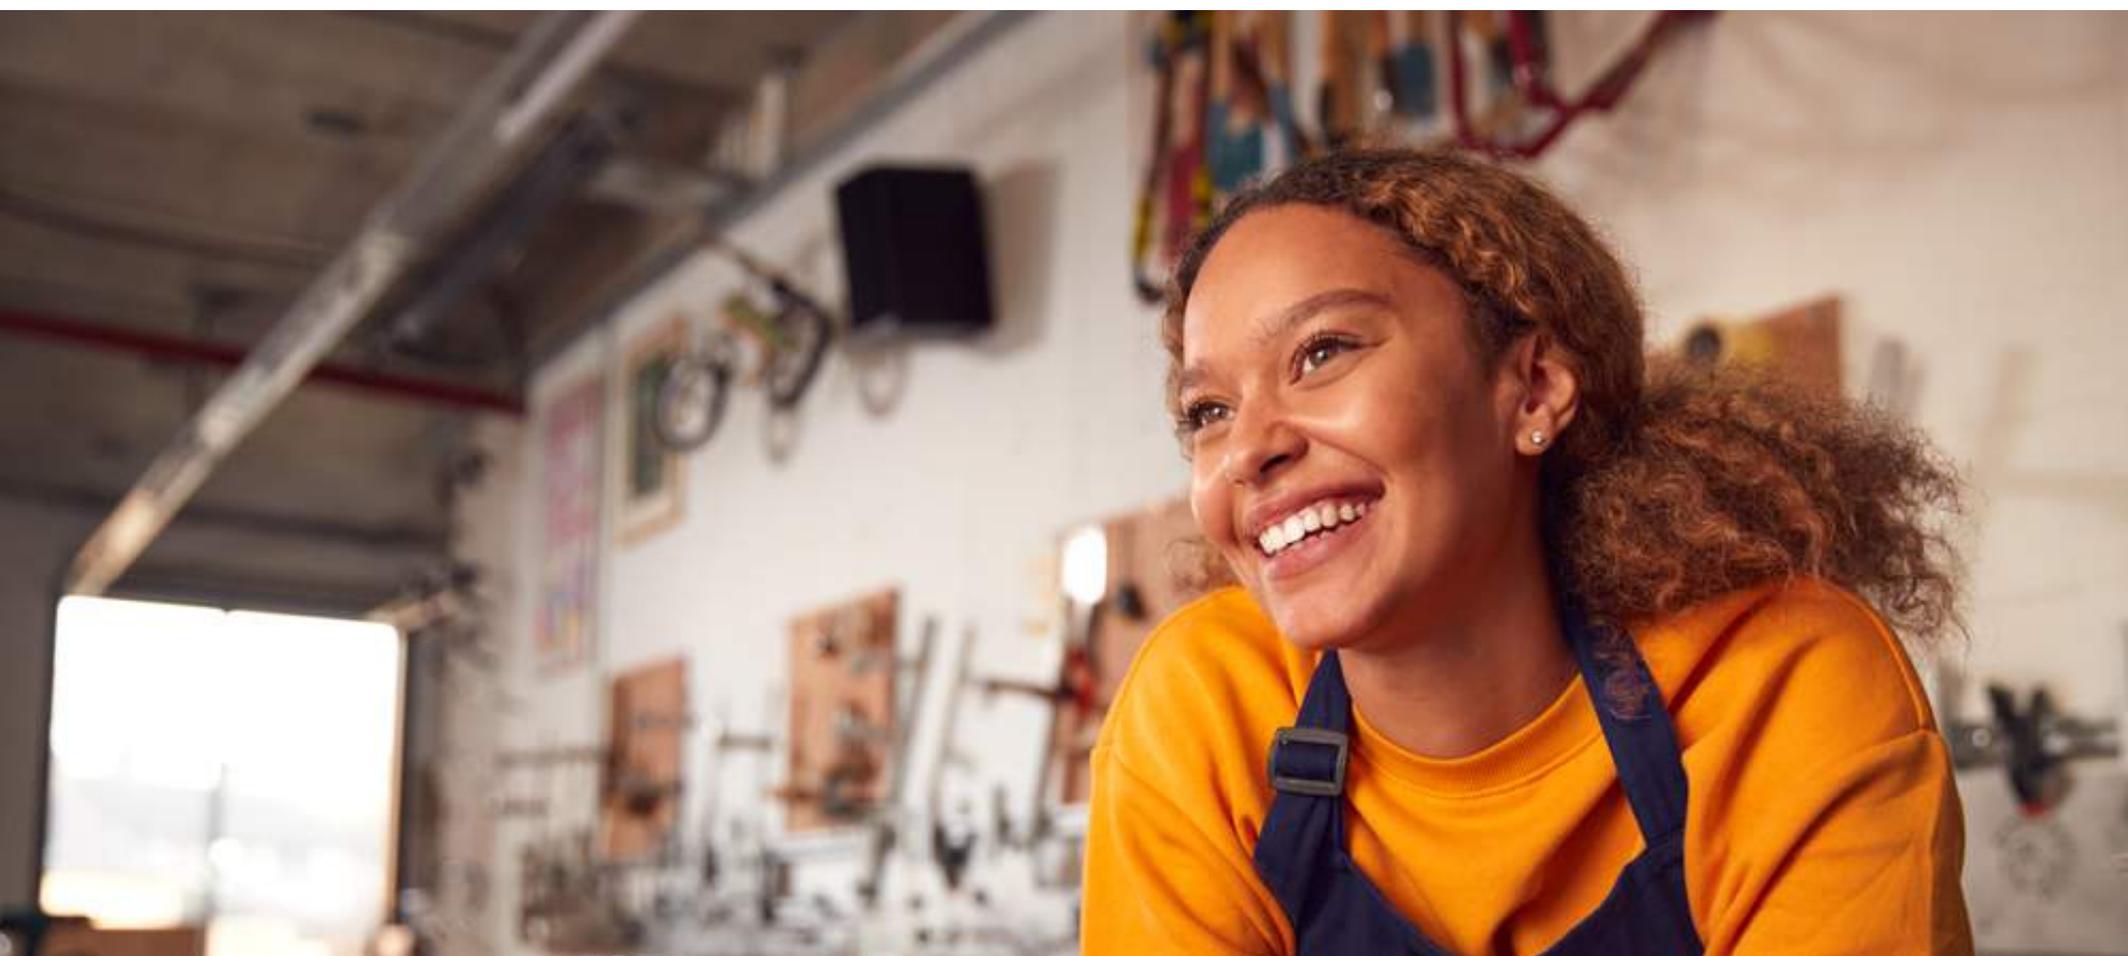

You're concerned about integrating with your accounting system or ERP

Small Business Solution #5

Centsoft integrates with popular ERPs

HARDER

INVOICE

EASIER

INVOICE

Lack of integration makes life more difficult with software that does not connect
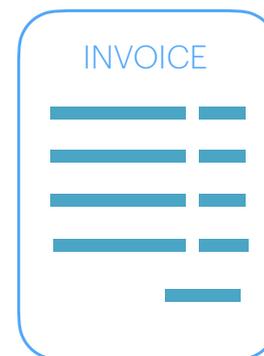

Seamless integration with Quickbooks, NetSuite, SAP Business One, Dynamics 365 BC, Xero and more.

Customers find Centsoft "Easy to Use" ★★★★★

"It's amazing. Centsoft recognizes the invoice and it's learning from those invoices, making it a smoother process. Once those invoices are getting thrown into the project manager teams, it's already filled out for them to review." – *Adrian Galvin, VMG Construction*

"We have a growing number of projects and get hundreds of invoices every single month, which was a pretty overwhelming task every single month for each approver." – *Ryan Tatum, Tatum Homes*

"I was involved when we started using Centsoft, and one of the reasons we chose them was that we immediately thought it looked easy to use. I also found that you get a good overview when you work in the system." – *Ann-Charlott Strömberg, Mattssons*

"That kind of surprised me (invoice data capture) how it can pick up because every invoice is different, it's not like every invoice is the same format — every invoice has a different format." – *Nikki Milian, Smiles First Corporation*

Integration

The data integration process can often seem overwhelming. Our industry standard Rillion Integration Engine alleviates this burden with powerful integration capabilities built into a straightforward, easy-to-use graphical user interface.

Rillion has over 2,500 installed clients globally, all connected to one or more ERP, purchasing, or accounting system The Rillion Integration Engine interface offers several options to facilitate communications and data sharing between Rillion and your business system.
